Dear Alumni, Parents, and Friends of Tufts,

We invite you to witness one of the greatest feats of the modern age—the Panama Canal, a stunning example of engineering prowess. Unmatched in drama, this nearly 50-mile passage through the narrow Isthmus of Panama continues to astonish even the most veteran traveler. During a specially arranged and narrated daylight transit, experience the mighty locks that raise and lower ocean-going vessels 85 feet, employing the force of gravity to achieve in mere hours what once involved a three-week circumnavigation of South America.

This cruise experience showcases Earth’s most pristine ecosystems in the rainforests and islands of Costa Rica and Panama at the best time of year. Visit the stunning and biodiverse Manuel Antonio National Park, where expert naturalists will lead a trail walk through an ecosystem of rare species, including the scarlet macaw and fiery-billed aracari. Tour acclaimed architect Frank Gehry’s only design in Latin America—the Biodiversity Museum—and explore the heart of Panama City’s UNESCO World Heritage-designated old town of Casco Antiguo.

Along with alumni from our like-minded partner institutions on this departure, National Trust for Historic Preservation and Fordham University, cruise aboard the exclusively chartered, Five-Star Le Bellot, a sophisticated small ship offering only 92 Suites and Staterooms, each with a private balcony. Dock in small ports of call inaccessible to larger vessels and enjoy enriching excursions led by experienced onboard naturalists. Reserve now while space and early booking savings are available.

To make a reservation, call our Tufts representative at Gohagan & Company at 1-800-922-3088.

Cheers!

Faculty Host: Lewis Edgers, Professor Emeritus of Civil and Environmental Engineering at Tufts University. A professional engineer and Fellow of the American Society of Civil Engineers, Professor Edgers is especially interested in the relationship between people and their environment, natural hazards, and energy systems. He has lectured extensively on the design, construction, history, and operation of the Panama Canal. This will be his second Travel-Learn trip to the Canal.
Completed in 1914, the Panama Canal is considered one of the Seven Wonders of the Modern World by the American Society of Civil Engineers. France’s failed attempt to build a canal in the 19th century and implicit U.S. backing of Panama’s independence in 1903 created diplomatic conditions favorable to the U.S.-led effort. In 1904, the Hay-Bunau-Varilla Treaty granted exclusive canal rights to the U.S. across the Isthmus of Panama in exchange for $10 million and an annuity of $250,000.

Under the watchful eye of U.S. President Theodore Roosevelt, the canal’s realization hinged on the successful conversion of the original French sea-level plan to a lock-controlled canal system and crucial health care advances to prevent malaria and yellow fever outbreaks. This historic engineering feat opened new channels of international trade and allowed ships to travel between the Atlantic and Pacific Oceans in a fraction of the time required to circumnavigate South America. Following a $5.25 billion expansion in 2016, the canal now accommodates more than twice the cargo.
